

Education

Vellore Institute of Technology, Vellore <i>Bachelor of Technology in Information Technology (Current CGPA: 9.05)</i>	Tamil Nadu, India 2024 – 2028
Amity International School, Mayur Vihar <i>CBSE Class XII (Percentage: 95.4%)</i>	New Delhi, India 2024
Mayoor School, Noida <i>CBSE Class X (Percentage: 98.2%)</i>	Uttar Pradesh, India 2022

Technical Skills

Languages: Java (Proficient), C, C++, JavaScript, Python
Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, Problem Solving
Frontend: React.js, HTML, CSS, JavaScript, Vite
Backend & Database: Node.js, Express.js, MongoDB, REST APIs
Tools: Git, GitHub, VS Code
Areas of Interest: Software Development, Full Stack Development, DSA, Web Development

Projects & Hackathons

FocusHub – Productivity Management Platform — React, JavaScript, Node.js, Express, MongoDB	GitHub
- Built a full-stack productivity web application with React frontend and a custom Express/Node.js REST API backend, centralizing note-taking, task management, and goal tracking in a unified workspace - Designed and implemented a RESTful API with 15+ endpoints supporting full CRUD operations for notes, tasks, and goals, backed by MongoDB via Mongoose with structured schemas for each data model - Engineered three custom React Hooks (useNotes, useTasks, useGoals) encapsulating async API calls, state management, and edit/cancel/save workflows, keeping UI components fully decoupled from data logic - Built an interactive dashboard displaying real-time counts, pending task and active goal summaries, and per-module recent activity feeds by composing data from multiple hooks - Architected the frontend with React Router for client-side navigation and a reusable component hierarchy (AddNote, AddTask, AddGoal, page-level displays) to maximize modularity and maintainability	
BudgetBee – Personal Finance Manager — Full Stack Project	GitHub
- Developed a full-stack personal finance web application using Node.js, Express, MongoDB, HTML, CSS, and JavaScript - Implemented authentication, role-based access control, and session management for secure user access - Designed REST APIs and enabled CRUD operations for transactions, budgets, categories, and financial goals - Built an analytics dashboard to visualize income, expenses, and spending patterns	
VinnovateIT Club Website — Frontend Developer	Website
- Contributed to frontend development during the Summer 2025 VinnovateIT project cycle - Designed and improved the Board Members page with emphasis on responsive layouts and visual consistency - Added and maintained content across Domains, Projects, and Events sections while working within an existing codebase	
Criminal Record Management System — Data Structures Project	
- Developed a criminal record management system supporting efficient storage, retrieval, and search operations - Implemented Hash Tables, AVL Trees, and Tries to optimize lookups, reward-based queries, and prefix searches - Enabled CRUD functionality and multi-criteria searches by ID, name, category, and reward amount	

Achievements

- Solved 100+ Data Structures and Algorithms problems on LeetCode
- Regularly practicing problem-solving and core CS concepts

Extracurricular Activities

- Technical Member, Mozilla Firefox Club
- Participated in multiple university-level hackathons
- Active member of technical communities and collaborative learning groups
